Sudatel Telecom Group Limited
Independent Auditor's Review Report to the Board of Directors on the Interim Condensed Consolidated Financial Information for the Nine Months Ended September 30, 2026

Introduction

We have reviewed the accompanying interim condensed consolidated statement of financial position of Sudatel Telecom Group Limited and its subsidiaries (together called "the Group") as at September 30, 2026, and the related condensed consolidated statements of profit or loss and other comprehensive income, changes in equity and cashflows for the nine months ended September 30, 2026. Management is responsible for the preparation and presentation of this financial information in accordance with International Accounting Standard – 34 "*Interim Financial Reporting" (IAS 34)*. Our responsibility is to express a conclusion on this interim condensed consolidated financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review of interim condensed consolidated financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial information is not prepared, in all material respects, in accordance with International Accounting Standard – 34 "*Interim Financial Reporting"*.

Emphasis of matters

We draw your attention to;

1. Note 2.1 of the interim condensed consolidated financial statements which indicates that the Group has generated profit during the nine months ended September 30, 2026 of **USD 14.183 million** (September 30, 2025: profit USD 71.082 million), as of that date, the Group's current liabilities exceeded its current assets by **USD 190.544 million** (September 30, 2025 Re-stated: USD 226.693 million). This condition and other matters indicate an uncertainty that may cast doubt on the Group's ability to continue as a going concern. However, the interim condensed consolidated financial statements have been prepared on going concern basis, and the validity of this assumption depends upon the generation of sufficient cash flow by the Group to meet its liabilities as they fall due.

2. Note 2.2 of the interim condensed consolidated financial statements mentions that the Republic of Sudan has been economically unstable for several years. In February 2021, the Central Bank of Sudan floated SDG (Local Currency of Sudan) to open the market, which resulted in a devaluation of SDG against USD by 1,413%. Consequently, in 2022, the economy of the Republic of Sudan experienced hyperinflationary conditions, which was further aggravated in 2023 and 2024 due to war. These hyperinflationary economic conditions continued with accumulated devaluation of SDG against USD by 180% during the year ended 2025 and by 227% during nine months ended September 30, 2026. The management and the Board of Directors of the Group evaluated the adoption of IAS 29 and concluded that the adoption/restatement of the interim condensed consolidated financial statements as per IAS 29 will not represent the true and fair view of the operational results and financial position of the Group; therefore, IAS 29 is not adopted for the Republic of Sudan Operations, for the nine months ended September 30, 2026, on the basis that:

    i. The Government of Sudan has not officially declared the economy of the country as Hyper Inflationary, and
    ii. No official General Price Index / Consumer Price Index (CPI) has been published for the restatement of the financial statements as per IAS 29.

Sudatel Telecom Group Limited
Independent Auditor's Review Report to the Board of Directors on the Interim Condensed Consolidated Financial Information for the Nine Months Ended September 30, 2026 (Continued)

3. Note 2.3 of the interim condensed consolidated financial statements mentions that the Group's Sudan operations in and around the city of Khartoum and some other areas have been affected by the war since mid-April 2023. Due to hostilities, the Group has sustained damages/losses to its Property, Plant & Equipment and Inventory in the affected areas, and physical access to the operational sites of the Group in the affected areas remained minimal or limited. The management of the Group, during the period from January 1, 2023 to September 30, 2026, has assessed accumulated impairment/loss to the extent of USD 40.951 million related to Property, Plant & Equipment and Inventory, including USD 2.060 million recognized during the nine months ended September 30, 2026. The damages / losses have been assessed based on detailed assessments performed by the operational teams on the ground including physical verification of off-line cell sites, results of which are reviewed/approved by the War Damage Assessment Committee.

4. Note 2.5 of the interim condensed consolidated financial statements which describes the significant judgements applied by management in determining foreign exchange rates used for translating the Sudan Operations in circumstances where foreign currency exchangeability was limited. As disclosed in Note 2.5 the management has applied estimated exchange rates based on observable market information and foreign exchange transactions carried out by the management through formal financial institutions.

Our conclusion is not modified with respect to the above matters.

4. ETSN International Limited of British Virgin Island
5. Expresso Senegal (BVI) Limited of British Virgin Island
6. EMR International Limited of British Virgin Island
7. Intercel Holding SA of Luxemburg
8. Expresso General Trading LLC UAE

Associated Companies of the Group:

1. Arab Submarine Cables Company Limited of Kingdon of Saudi Arabia
2. Electronic Banking Services of Sudan
3. Al Gadida Asima Services Company Limited of Sudan

The **Joint Ventures** in which the Group is one of the Joint Venture Partner are:

1. Sudasat Company of Sudan
2. Sudani Fintech Services Company Ltd

The interim condensed consolidated financial statements for the nine months ended September 30, 2026, were approved and authorised for issue in accordance with a resolution of the Board of Directors on November 18, 2026.

2. SIGNIFICANT ACCOUNTING POLICIES

2.1 GOING CONCERN

The Group has generated profit of **USD 14.183 million** during the nine months ended September 30, 2026 (September 30, 2025, USD 71.082 million) , as of that date, the Group's current liabilities exceeded its current assets by **USD 190.544 million** (September 30, 2025 Re-stated: USD 226.693 million).

The interim condensed consolidated financial statements of the Group have been prepared on a going concern basis which assumes that the Group will continue to be in existence in the foreseeable future except for the operations of Intercel Plus Guinee S.A Company in Guinea Conakry which were discontinued in 2018.

The operations of the Group in Sudan have been adversely affected by the devaluation of the functional currency against the United States Dollars. Management is confident in its ability to generate sufficient operating cash flows, obtain new financing facilities as well as renegotiate favourably its terms of payments with existing creditors and lenders. Accordingly, management considers the going concern basis of preparation to be appropriate.

2.2 BASIS OF PREPARATION

The interim condensed consolidated financial statements of the Group for the nine months ended September 30, 2026 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and the presentation and disclosure requirements of IAS 34 Interim Financial Reporting, and interpretations issued by the International Financial Reporting Interpretation Committee (IFRIC), except for IAS 29 "Financial Reporting in Hyper Inflationary Economies". These interim condensed consolidated financial statements do not include all the information and disclosures required in annual consolidated financial statements and should be read in conjunction with the Group's annual consolidated financial statements for the year ended December 31, 2025. The accounting policies and methods of computation applied in preparing these interim condensed consolidated financial statements are consistent with those applied in the Group's annual consolidated financial statements for the year ended December 31, 2025, except for the adoption of new and amended standards effective from January 1, 2026, and the matters described in Notes 2.3 and 2.5.

The interim condensed consolidated financial statements have been prepared on a historical cost basis of measurement except for certain property, plant and equipment and intangible assets that are measured at revalued amounts as at December 31, 2025, financial assets at fair value through profit or loss and fair value through OCI measured at fair value, assets held for sale measured at fair value less costs to sell and defined employee benefit plans measured at present value. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

The interim condensed consolidated financial statements are presented in US dollars (USD). The functional currency of the Sudan operations of the Parent is Sudanese Pounds (SDG). Due to ongoing conflict in Sudan, Central Bank of Sudan or any commercial bank does not officially publish foreign exchange rates on consistent basis. Accordingly, spot rates of exchange contracts signed by the Group with parties in Sudan through commercial banks are used for the purpose of recording of foreign exchange transactions and conversion of SDG denominated financial records of the Sudan Operations to USD. For this purpose, the management maintains a log of such contracts.

As set out in Note 2.1, these interim condensed consolidated financial statements have been prepared under the going concern basis except for the operations of Intercel Plus Guinee S.A in Guinea-Conakry which have been prepared on breakup value basis. Operations of Intercel Plus Guinee S.A. were discontinued and the Company has been under receivership following the withdrawal of its operation license by the of Ministry of Communication of Guinea-Conakry in October 2018. Further, during February 2019, the local court also appointed administrator for the liquidation of the Intercel Plus Guinee S.A.

The economy of the Republic of Sudan is economically unstable from number of years, in February 2021, the Central Bank of Sudan floated SDG (Local Currency of Sudan) to open the market, which resulted in a devaluation of SDG against USD by 1,413%. Consequently, in 2022, the economy of the Republic of Sudan experienced hyperinflationary conditions, which was further aggravated in 2023 and 2024 due to war. These hyperinflationary economic conditions continued with devaluation of SDG against USD by 180% during the year ended December 31, 2025, and by 227% in nine months ended September 30, 2026. The management and the Board of Directors of the Group evaluated the adoption of IAS 29 and concluded that the adoption/restatement of the interim condensed consolidated financial statements as per IAS 29 will not represent the true and fair view of the operational results and financial position of the Group; therefore, IAS 29 is not adopted for the Republic of Sudan Operations, on the basis that:

i. The Government of Sudan has not officially declared the economy of the country as Hyper Inflationary, and
ii. No official General Price Index / Consumer Price Index (CPI) has been published for the restatement of the consolidated financial statements as per IAS 29.

2.3 POLITICAL UNCERTAINTY IN SUDAN

Since mid-April 2023 Sudan have been affected by the war in and around capital city Khartoum, which has adversely affected the economy and security situation of the Country. The Conflict has directly affected the Group's operations and its telecommunication assets, as Khartoum and certain other areas in Sudan continue to experience hostilities. Since the start of the war the management of the Group has been continuously monitoring the network and base station equipment particularly in areas experiencing significant downtime. Management has taken a number of mitigating actions, including reallocation of staff to secure locations, design and implementation of data center in Port Sudan, development and implementation of emergency disaster recovery capabilities, arrangement of fuel for cell sites and electronic distribution of top up vouchers through large local bank. As a result of which a significant portion of network remains available and continues to generating revenue.

The management has prepared and reviewed the financial forecasts for upcoming three years, taking into consideration most likely possible downside scenarios for the ongoing impacts of war on the business of the Group in Sudan. These forecasts were based on following key assumptions:

i. There will be no substantial increase in the intensity of hostilities, thereby no significant adverse impact on the number of active sites.
ii. The Group will have the capacity to conduct maintenance and repair tasks in the affected territories, ensuring a satisfactory level of network performance in regions where it is feasible while considering the physical security of technical specialists.
iii. There will be no significant fluctuations in the fuel rate, foreign exchange rates and other major costs during the course of the conflict.
iv. The Group will be able to ensure the uninterrupted functioning of its crucial IT infrastructure, aligning with management's implemented measures and incident response and disaster recovery plans.
v. The revenue from services will be sufficient for the Group to meet both operating expenses and essential capital investments.

As per these forecasts, considering negative scenarios, management expects that the Group possesses adequate resources to effectively handle its operations in Sudan for the foreseeable future. The management of the Group has been constantly monitoring the situation in Sudan, including assessments related to the existence and damages to the Assets, including both Fixed Assets and Inventory of the Group located in Sudan. The management of the Group, till September 30, 2026 has assessed and recognized accumulated impairment / loss to the extent of USD 40.951 million in respect of property, plant and equipment and inventories located in Sudan, including USD 2.060 million in respect of property, plant and equipment, recognized during the nine months period ended September 30, 2026.

Despite the ongoing war in the Republic of Sudan, the Group has managed to generate profit of USD 117.535 million during the year ended December 31, 2025 and USD 14.183 million during the nine months ended September 30, 2026 although the operations of Group in Sudan are disrupted, and currently only 80% of the Network is operational.

2.4 CORRECTION OF PRIOR YEAR ERRORS

During 2025, the Group identified accounting errors affecting the multiple Financial Statement Line Items (FSLIs) balances of Chinguitel S.A. The Group corrected these errors retrospectively in accordance with IAS 8. Accordingly, comparative amounts as at and for the period ended 30 September 2025 have been restated where affected. Details of the adjustments are presented in Note 31.

Accounting Transaction Recording Errors in Chinguitel S.A. Mauritania

In the financial statements of Chinguitel S.A. of Mauritania number of accounting transaction errors were identified related to wrong recording of collections and payments as settlement against receivable and payable balances without recording of related invoices in Account Receivables and Accounts Payable modules of oracle. These errors resulted in understatement of receivable and liability balances. After recording of adjustments to resolve the identified errors now receivable and payable balances reflect the accurate position of the Group as at September 30, 2025. Following is the accumulated impact of re-statements clustered in applicable interim condensed consolidated financial statement line items:

Financial Statement Line Items (FSLI)	September 30, 2025 Previously reported	September 30, 2025 Re-Stated	Change
	USD million		
Retained Earnings – decrease	196.940	184.880	**(12.060)**
Property, plant and equipment – increase	392.090	393.436	**1.346**
Inventories – decrease	10.515	10.424	**(0.091)**
Trade and other receivables – decrease	150.738	147.415	**(3.323)**
Cash and bank balances – decrease	44.574	44.441	**(0.133)**
Trade payables and accruals – increase	260.253	268.082	**(7.828)**
Deferred revenue – increase	28.745	30.777	**(2.031)**

2.5 Lack of Exchangeability

The Group's interim condensed consolidated financial statements are prepared in accordance with IAS 21, the Effects of Changes in Foreign Exchange Rates. Foreign currency transactions are initially recorded by the Group entities at the spot exchange rate between the functional currency and the foreign currency at the date of the transaction. At each reporting date, foreign currency monetary items are translated using the closing exchange rate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction, while non-monetary items measured at fair value are translated using the exchange rates at the date when the fair value is measured.

During the year, the Group was exposed to a jurisdiction (the Republic of Sudan) in which access to foreign currency markets was restricted and, as a result, the relevant foreign currency was not exchangeable into the Group's functional currency at the reporting date for certain transactions and balances. In accordance with IAS 21, where an observable spot exchange rate is not available due to lack of exchangeability, management applies a best-estimate exchange rate that reflects the rate at which the Group would have been able to exchange the currency at the measurement date, had exchangeability been available.

The exchange rates applied in such circumstances were determined using observable inputs to the maximum extent practicable, including official rates published by relevant authorities, cross-currency reference rates and other market-based indicators. Where necessary, management applied judgment to derive a rate that represents the underlying economic substance of the transactions and balances. The application of the estimated exchange rates resulted in foreign exchange differences being recognized in profit or loss, except where exchange differences were recognized in other comprehensive income in accordance with IAS 21.

Management considers the determination of exchange rates in circumstances of lack of exchangeability to be a significant area of judgment. The key judgements relate to the selection of appropriate data sources and the calibration of the rate to reflect the economic conditions prevailing at the reporting date. As of the reporting date, significant monetary assets and liabilities subject to lack of exchangeability amounted to USD 58.912 million and USD 407.515 million respectively related to Sudan Operations. Exchange loss recognized in profit or loss arising from such balances during the nine months ended, related to Sudan Operations amounted to USD 19.566 million.

The Group continues to actively monitor regulatory developments and market conditions in relevant jurisdictions. Any improvement or deterioration in exchangeability could have a material impact on future reported results and financial position.

The Group used the following rates for the purpose of translating its operations in the Republic of Sudan

Closing Rate	1 USD = 8,189 SDG
Average Exchange Rate	1 USD = 4,458 SDG
Cross Currency used	1 USD = AED 3.67

The source of cross-currency is based on actual financial transactions through formal financial institutions.

Due to the material devaluation of the Sudanese Pound (SDG) against the US Dollar (USD) the profit or loss of the Sudan operations for the nine months ended September 30, 2026, has been translated using the average exchange rate for the nine months period ended. The profit or loss for the quarter ended September 30, 2026, has been derived by deducting the profit or loss reported for the nine months ended September 30, 2026, from the profit or loss for the half year ended June 30, 2026, and adjusted to reverse the devaluation impact relating to the first six months arising from the translation methodology.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

a) *Revenue recognition*

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates, and other sales taxes or duty. The Group assesses their revenue arrangements against specific criteria in order to determine if they are acting as principal or agent. The Group have concluded that they are acting as a principal in all their revenue arrangements.

b) *Foreign currencies*

The Group's interim condensed consolidated financial statements are presented in USD. For each entity, the Group determines the functional currency and items included in the financial statements of each entity are measured using that functional currency. The Group uses the direct method of consolidation and on disposal of a foreign operation, the gain or loss that is reclassified to profit or loss reflects the amount that arises from using this method.

c) *Property, plant and equipment/Depreciation*

Property and equipment are initially recorded at cost and subsequently are stated at cost less accumulated depreciation and any impairment in value; except for the freehold land which is recorded at the market value. Freehold land and capital work in progress are not depreciated.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

• Buildings	Over 15 to 40 years
• Network equipment and cables	Over 5 to 25 years
• Communication equipment	Over 5 to 25 years
• Furniture and computers	Over 5 to 10 years
• Motor vehicles	5 years
• Earth station	25 years
• Submarine cable	25 years

d) *Borrowing costs*

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial quarter of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. Qualifying assets are those assets that take a substantial quarter to get ready for their intended use. The borrowing costs eligible for capitalization are the actual borrowing costs incurred on the borrowing during the year less any investment income on the temporary investment of those borrowings.

e) *Intangible assets*

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. Internally generated intangible assets, excluding capitalised development cost, are not capitalised and expenditure is reflected in the interim condensed consolidated statement of profit or loss in the year in which the expenditure is incurred. The useful lives of intangible assets are assessed to be either finite or indefinite.

The useful lives estimated by the management for the amortisation of intangible assets are as follows:

	Number of years
Licenses	Over 15 to 21 years
Software	Over 5 to 20 years

f) *Investments*

Investments are initially recognized at cost being the fair value of the consideration paid including the transaction charges associated with the investment. The Group determine the classification of its investments on initial recognition.

g) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined on a weighted average basis and includes expenditure incurred in bringing each product to its present location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

h) Financial assets at fair value through profit and loss

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. These are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

i) Cash and short-term deposits

Cash and short-term deposits in the statement of financial position comprise cash at banks and on hand and short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value.

j) *Provisions*

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised in the interim condensed consolidated statement of profit or loss as a finance cost.

3.1 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

During the year there were no changes in the accounting policies, also the Group has no material impact of adoption of any new standard, interpretation or amendment that has been issued but is not yet effective.

3.2 SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Group's interim condensed consolidated financial statements require management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the reporting date. However, uncertainty about the assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future quarters.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

- Impairment of inventories
- Impairment of non-financial assets
- Useful lives of property, plant and equipment and intangible assets
- Business combinations
- Classification of investments
- Contingent liabilities
- Fair values - unquoted equity investments and business combinations
- Zakat & Taxes
- Impairment of financial assets

4. ADOPTION OF NEW AND AMENDED INTERNATIONAL FINANCIAL REPORTING STANDARDS AND INTERPRETATIONS

4.1 New and amended IFRS Accounting Standards effective for the current interim period

The accounting policies adopted in the preparation of these interim condensed consolidated financial statements for nine months ended September 30, 2026 are consistent with those applied in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2025, except for the adoption of new and amended IFRS Accounting Standards and interpretations issued by the International Accounting Standards Board ("IASB") that are effective for annual periods beginning on or after 1 January 2026.

The adoption of these new and amended IFRS Accounting Standards and interpretations did not have a material impact on the disclosures or amounts reported in these interim condensed consolidated financial statements, unless otherwise disclosed below. The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

New or amended IFRS Accounting Standard	Summary of requirements
Amendments to IFRS 9 and IFRS 7 – Classification and Measurement of Financial Instruments	The amendments clarify certain requirements relating to the classification and measurement of financial instruments, including the derecognition of financial liabilities settled through electronic payment systems, the assessment of contractual cash flow characteristics of financial assets with contingent features and related disclosure requirements.
Annual Improvements to IFRS Accounting Standards – Volume 11	The amendments comprise narrow-scope improvements to IFRS Accounting Standards, including amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7.
Amendments to IFRS 9 and IFRS 7 – Contracts Referencing Nature-dependent Electricity	The amendments address the accounting and disclosure requirements for contracts referencing nature-dependent electricity, including certain power purchase arrangements and related hedge accounting and disclosure requirements.

The above amendments did not have a material impact on the Group's interim condensed consolidated financial statements.

4.2 New and amended IFRS Accounting Standards in issue but not yet effective and not early adopted

The following new and amended IFRS Accounting Standards have been issued but are not yet effective for the Group for the nine months ended September 30, 2026 and have not been early adopted in preparing these interim condensed consolidated financial statements. The Group intends to apply these standards and amendments, where applicable, when they become effective.

New or amended IFRS Accounting Standard	Effective for annual periods beginning on or after
IFRS 18 – Presentation and Disclosure in Financial Statements	1 January 2027
IFRS 19 – Subsidiaries without Public Accountability: Disclosures	1 January 2027
Amendments to IAS 21 – Translation to a Hyperinflationary Presentation Currency	1 January 2027

IFRS 18 – Presentation and Disclosure in Financial Statements

IFRS 18 replaces IAS 1 *Presentation of Financial Statements* and introduces new requirements for presentation and disclosure in financial statements, with a particular focus on the statement of profit or loss. The standard introduces defined categories and subtotals in the statement of profit or loss, requirements to disclose management-defined performance measures and enhanced principles for aggregation and disaggregation of information.

The Group is currently assessing the impact of IFRS 18 on the presentation and disclosures in its consolidated financial statements.

IFRS 19 – Subsidiaries without Public Accountability: Disclosures

IFRS 19 permits eligible subsidiaries to apply reduced disclosure requirements while applying the recognition, measurement and presentation requirements of other IFRS Accounting Standards. IFRS 19 is available to subsidiaries that do not have public accountability and whose ultimate or intermediate parent produces consolidated financial statements available for public use that comply with IFRS Accounting Standards.

The Group is currently assessing whether IFRS 19 will be applicable to any of its subsidiaries.

Amendments to IAS 21 – Translation to a Hyperinflationary Presentation Currency

The amendments to IAS 21 introduce requirements for translating amounts from a functional currency that is the currency of a non-hyperinflationary economy into a presentation currency that is the currency of a hyperinflationary economy. The amendments are intended to reduce diversity in practice and provide a clearer basis for reporting in a hyperinflationary presentation currency.

The Group is currently assessing the impact of these amendments on its interim condensed consolidated financial statements.

5.1 The management of the Group has been constantly monitoring the war situation in the Republic of Sudan, including assessment related to existence and damages to the assets of the Group in the Republic of Sudan. By the end of Financial Year 2025, with respect to property, plant and equipment, the management has recorded accumulated charge of USD 26,993,011 including USD 2,591,989 for the year 2025, USD 7,409,457 for the year 2024 and USD 16,991,565 for the year ended 2023. Due to devaluation functional currency of Sudan the accumulated value of war losses related to property, plant and equipment has been reduced by USD 14,014,807 as at December 31, 2025. These estimates may increase or decrease in subsequent periods as more detailed and accurate evaluation and assessment could be possible after security situation improves in war effected areas.

5.2 As at September 30, 2025 the accumulatd restated cost of fixed assets was USD 765,853,648, accumulated provison for depreciation was USD 358,454,701 and value of fixed assets impaired due to war in Sudan was USD 13,872,149 leading to net fixed asset book value of USD 393,435,798.

5 PROPERTY AND EQUIPMENT (continued)

The Group's freehold land, buildings, communication & network equipment, software and licences, related to Sudan are stated at their revalued amounts, evaluated by the independent valuer, being the fair value at December 31, 2025, less applicable depreciation / amortization and impairement losses as at September 30, 2026. The Group intend to carry out revaluation excercise in 2 to 5 years intervals.

The fair value of the freehold land was determined based on fair value basis, comparable and residual method and the fair value of buildings, communication and network equipment and software and licenses was determined using replacement cost and fair value method, in accordance with IFRS. The Group intends to carry out revaluation exercise in 3 to 5 years intervals.

Details of the Group's freehold land, buildings, communication and network equipment, software and licenses and information about the fair values are as follows:

	FV as at September 30, 2026	FV as at December 31, 2025
	USD	USD
- Freehold land	**80,700,088**	183,601,456

15.1 This relates to Equipment Supply Contract between the Group and Huawei Technologies Co. Ltd for implementation of Sudatel Network Resilience Project for Sudan. As per this contract Huawei Technologies Co. Ltd is providing vender financing, according to which 25% of the invoice amount is paid on delivery and submission of invoices, whereas, balance is payable in 4 equal instalments spread over 24 months from delivery of shipping documents. The finance cost related to vendor financing is implicit in the invoices raised by Huawei Technologies Co. Ltd under the contract and capitalized along with the Project.

15.2 This relates largely to long and medium terms foreign and local currency loans. The tenors of these range between 2 and 5 years and interest rates range between 4.9% and 17.34%. The largest loan is from China Development Bank (CDB) with a balance equivalent to Euro 228 million, including balance of principal and related accrued finance cost as at August 31, 2025, as confirmed by CDB in formal communication with the Group. In accordance with the loan agreement with CDB the Group is in default since no principal and / or interest payments has been made to CDB since November 2017. The management has been negotiating the restructuring of the loan with CDB the terms of are not finalized yet. During the year CDB also communicated with the guarantor of the loan for recourse. In response of this communication the Group and the guarantor of the loan has agreed on five year repayment term, but this is not formally agreed by CDB. This amount is denominated in Euro as per the loan agreement with CDB. The amount is decreased as compared to December 31, 2025 balance by USD 52,767 due to foreign exchange parity changes between Euro and USD during the nine months ended September 30, 2026.

15.3 This amount is denominated in Euro as per the loan agreement with CDB. The amount is decreased as compared to December 31, 2025 balance by USD 26,968 due to foreign exchange parity changes between Euro and USD during the nine months ended September 30, 2026.

15.4 During 2025 the Group and the guarantor of CDB loan formally executed an agreement for repayment of CDB loan to the guarantor in 60 equal instalments starting from October 2025. The repayments are denominated in SDG at the official exchange rate applicable on October 1 of each year. Under this agreement the guarantor of the loan has taken the responsibility to make onward repayments to CDB. The Group and the guarantor has communicated to CDB about this agreement, formal acknowledgement and concurrence is awaited. This amount represents the instalments paid by the Group to the guarantor during the period from October 2025 to September 2026.

16.2.1 The above balances of unclaimed dividends is related to shares traded on Khartoum Stock Exchange and Abu Dhabi Stock Exchange. The dividend payable for shares listed on Khartoum Stock Exchange are paid once dividend is claimed by the shareholder from the Group, following the standard dividend payment process. The dividend payable for shares listed on Abu Dhabi Stock Exchange are disbursed through Abu Dhabi Stock Exchange, based on applicable shareholding of individual shareholders at the time of disbursement of dividend. The dividend declared amount of USD 15,682,853 was due for payment on October 12, 2026, but due to funds movement restrictions in Sudan it has been delayed. It is now planned to be disbursed to Abu Dhabi Stock Exchange in November 2026.
