Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying 30 September 2026 condensed consolidated interim financial statements are not prepared, in all material respects, in accordance with IAS 34, 'Interim Financial Reporting'.

3. Material accounting policies

The accounting policies applied in the preparation of these condensed consolidated interim financial statements are consistent with those applied by the Group in its recent annual audited consolidated financial statements as at and for the year ended 31 December 2025.

New accounting standards, interpretations and amendments for 2026 and forthcoming requirements

Management has assessed the potential impact of the ongoing geopolitical situation in the region and has concluded that there is no material impact on the carrying amounts of the Group's assets as at the reporting date.

5. Financial instruments

– Financial risk management

The Group's financial risk management objectives and policies are consistent with those disclosed in the consolidated financial statements as at and for the year ended 31 December 2025.

– Valuation of financial instruments

The Group measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: inputs that are quoted market price (unadjusted) in an active market for identical instruments.

Level 2: inputs other than quoted prices included within Level 1 that are observable either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted market prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: inputs that are unobservable. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The table below analyses financial instruments, measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorised:

Upon acquisition of the additional interest, CMC has become a wholly owned subsidiary of the Group. Accordingly, the investment in the equity accounted investee has been derecognised and the entity has been consolidated on a line-by-line basis effective from the date of acquisition.

The following table summarises the recognised amounts of assets acquired and liabilities assumed at the date of acquisition:

% interest acquired	**80%**
Fair value of assets and liabilities acquired:	**AED'000**

Add: fair value of identifiable net liabilities acquired	**45,781**

The Group engaged an independent valuer to perform the fair valuation of net assets acquired. A combination of valuation techniques depending upon the nature of the asset were used for measuring the fair values of significant assets acquired and liabilities assumed. These included: depreciated replacement costs, discounted cash flows, income capitalization and comparable market value, whichever was most relevant.

The values have been determined provisionally, if new information is obtained within one year of the date of acquisition about the facts and circumstances that existed at the date of acquisition which requires adjustments to the recognised amounts of identifiable assets and liabilities, the accounting for acquisition will be revised accordingly.

20. Corporate tax law

The Group is subject to United Arab Emirates (UAE) Corporate tax (CT) effective from 1 January 2024 following the introduction of the CT regime via Federal Decree-Law No. 47 of 2022 on the Taxation of Corporations and Businesses.

The Group's consolidated effective tax rate in respect of continuing operations for the nine-month period ended 30 September 2026 was 8.67 % (nine-month period ended 30 September 2025: 8.66%).

The income tax expense is determined by multiplying the profit before tax for the reporting period ended 30 September 2026 by the applicable income tax rate adjusted for the tax effect of certain items recognized in full in the period which is in line with the weighted average annual income tax rate expected for the full year multiplied by the profit before tax.

Pillar two

The Organisation for Economic Co-operation and Development (OECD) has issued the Global Anti-Base Erosion (GloBE) Model Rules, which mandate a minimum tax rate of 15% per jurisdiction (Pillar Two). Various countries have either enacted or are in the process of enacting tax legislation to fully or partially comply with Pillar Two. The United Arab Emirates, where the Group's Ultimate Parent Entity is situated, has enacted the Cabinet Decision No. 142 of 2024 on the Imposition of Top-up Tax on Multinational Enterprises. The Group falls within the scope of these rules from 1 January 2025.

Article 9.3 of the UAE DMTT framework offers Initial Phase of International Activity (IPIA) relief, which permits a reduction of the top-up tax to zero for UAE entities for upto five years, provided that specific conditions are met. The Group fulfils the criteria for IPIA relief for FY 2026. Accordingly, the Group is not required to provide for current tax under Pillar two.

There is uncertainty regarding whether the Pillar Two model rules create additional temporary differences, whether deferred taxes should be remeasured for the Pillar Two model rules, and which tax rate should be used to measure deferred taxes. In response to this uncertainty, the IASB and AASB issued amendments to IAS 12 ‘Income Taxes’ on 23 May 2023 and 27 June 2023, respectively. These amendments introduce a mandatory temporary exception to the requirements of IAS 12, under which a company does not recognize or disclose information about deferred tax assets and liabilities related to the OECD/G20 BEPS Pillar Two model rules. The Group applied this temporary exception as of 30 September 2026.

21. Segment reporting

The Group has broadly three reportable segments as discussed below, which are the Group's strategic business units. The strategic business units operate in different sectors and are managed separately because they require different strategies. The following summary describes the operation in each of the Group's reportable segments:

Property	development of real estate for sale and leasing
Manufacturing, contracting and services	manufacture and sale of materials used in construction projects, executing construction contracts, production of raw and architectural glass, pharmaceutical products production, aluminium extruded products, laboratory furniture, healthcare service provider with specialized tertiary-care capabilities, including advanced robotic surgery and PET scan diagnostic facilities and education.
Investments	strategic investments in joint ventures and associates, investment banking, asset management and financial investments

Information regarding the operations of each segment is included hereafter. Performance is measured based on segment revenue and profit as management believes that profit is the most relevant factor in evaluating the results of certain segments relative to other entities that operate within these industries. There are a few transactions between the segments, and such transactions are carried out on arm's length basis and are eliminated on consolidation.
