Press Release:

"Drake & Scull's Passavant Energy & Environment Wins AED 59 Million Contract for Wastewater Treatment Infrastructure in India's Dholera Industrial City

Dubai, UAE, 16 November 2026 – Drake and Scull International PJSC (DSI) has announced that its wholly owned subsidiary, Passavant Energy & Environment, has secured a contract valued at around AED 59 million to design, build, and commission effluent and sewage treatment facilities serving the Dholera Prime Industrial Area in the Indian state of Gujarat. The award was made by Maharashtra Industrial Township Limited (MITL), a government undertaking overseeing the development of the region's industrial infrastructure.

Building on Our Presence in a Fast-Growing Infrastructure Market

This new contract highlights Passavant Energy & Environment's growing presence in India, positioning Passavant within one of the most dynamic infrastructure markets globally. India's rapid industrialization and its national focus on environmental compliance and water reuse are driving sustained demand for advanced treatment solutions, a segment where Passavant's German engineering heritage and decades of specialist experience give the Group a clear competitive edge. The win also deepens DSI's water and environmental presence in India while reinforcing its established base across the Middle East and North Africa.

Scope of Work

The contract, awarded on an Engineering, Procurement and Construction (EPC) basis, covers the full turnkey delivery of a 7 MLD Common Effluent Treatment Plant (CETP) and a 0.5 MLD Package Sewage Treatment Plant (STP). Passavant's responsibilities span the entire project lifecycle, from process design, engineering, and procurement through to construction and commissioning, with every stage engineered to meet stringent discharge and reuse standards while minimizing environmental impact.

Beyond construction, the agreement includes a four-year operation and maintenance term, during which Passavant will run the facilities to guaranteed performance levels and build local operational capability through the training and development of on-site personnel.

Commitment to Sustainable Growth

Commenting on the announcement, **Mr. Mokhtar Haddad,** CEO of Passavant, stated: "Winning another project in India is a significant achievement for Passavant and a strong endorsement of our technical credentials on a global stage. Treating industrial effluent to a high standard is central to sustainable industrial growth, and we are proud to bring our expertise to the Dholera development. This contract lays the foundation for a lasting presence in a market with enormous long-term potential."

In the same context, **Mr. Muin El Saleh**, DSI Group CEO, said: "Securing this award in India demonstrates the reach of our strategy to grow through specialized subsidiaries that compete on genuine technical depth. Passavant continues to win complex work on its own merits, which is precisely the disciplined, capability-led growth we are building across the Group. India is an important market for us, and this award reflects our continued commitment to it."
